Types:

Serif: extra details in the letters

Sans-serif: straight end letters

Monospace: every letter shares the same width

Weight: light, medium, bold, black

Style: Normal, italic(cursive + slanted), oblique(just slanted not curved)

Stretch: condensed, regular, extended

## **Generic suggested fonts in order of browser support:**

Serif: Georgia, Times, Times New Roman

Sans-serif: Arial, Verdana, Helvetica

Monospace: Courier, Courier New

**font-family:** Georgia, Times, Serif;

**//comma separated fonts incase the user doesn't have the font**

- Add a generic font at the end for safety
- If the font has more that two words put it in "double quotes"
- NO more that 3 fonts = rule of thumb

**font-size:** 12px;

200%;

1.3em; //em = width of letters
